## Summary

---

Detail-oriented Full Stack Developer with hands-on experience in building and maintaining scalable, data-driven web applications. Proven ability to collaborate with cross-functional teams, translate business needs into robust technical solutions, and drive process efficiencies. Strong foundation in both frontend (React.js, JavaScript) and backend (Python, SQL, PHP) technologies, with recent experience supporting data visualization and portfolio monitoring tools for enterprise environments. Formerly with TD Bank, bringing financial domain awareness and a security-first mindset to software development.

## Technical Skills

---

- Frontend: HTML5, CSS3, JavaScript, React.js, Responsive design, Bootstrap.
- Backend: PHP, Python (Pandas, NumPy), RESTful API design and development.
- Server and database management: Database design and normalization, SQL (MySQL), Data modeling and optimization, Data Visualization (Power BI).
- Tools & Platforms: GitHub, Cloudways, GitHub Actions (CI/CD), Jira, TestRail
- Other: Agile Methodologies, UAT, Linux-based Development Environments, MS Excel (Advanced)

## Education & Professional Experience

---

**Crosslinx Transit Solution - Constructor, Toronto, ON**

**2023 – Present**

**Full Stack Web Developer - Commissioning Assistant**

Develop and maintain a comprehensive web application for asset tracking, data storage, and reporting using PHP, JavaScript, HTML, and CSS.

- Collaborate with a cross-functional team of five developers, establishing a Git-based version control workflow that uses feature branches, pull requests, and code reviews to track, revert, and audit every change.
- Refactor frontend modules using React-style component principles, improving code reusability and maintainability.
- Utilize Power BI to create insightful visualizations from JSON data generated by the web application. These visualizations enabled stakeholders to make informed and data-driven decisions.
- Facilitate the transfer of data from existing Excel sheets in various departments to both Power BI and the web application, streamlining data management processes and improving overall efficiency.
- Implement security best practices and compliance measures to protect sensitive data and ensure adherence to industry standards and company requirements.
- Regularly monitor the application for bugs and performance issues, conducting routine maintenance and updates to deliver a seamless user experience.
- Stay current with the latest industry trends and technologies to bring innovative solutions to the web application and improve its functionality.

**TD Bank, Markham, ON**

**2020-2023**

**Underwriter**

Analyzed, reviewed, and made well-rationalized decisions for credit applications across a broad range of products, efficiently and effectively. Provided credit support, solutions, recommendations, advice, and alternative options when evaluating applications, ensuring all decisions adhered to company policies and procedures.

- Acquired, maintained, and applied credit and risk expertise in the lending discipline, offering guidance, assistance, and direction to colleagues.
- Prioritized and managed daily workloads to consistently meet SLA requirements for service and productivity.
- Contributed to satisfactory audit outcomes by understanding and following audit and process guidelines.

# Nasim Fekrat

---

Page Two

- Maintained a culture of risk management and control through effective processes aligned with the organization's risk appetite.
- Performed due diligence in support of all credit applications, verifying documentation and conducting thorough background analyses.

**Pong Game Studios, Woodbridge, ON**

**2018 – 2020**

**Quality Assurance Analyst**

Ran and wrote test cases in TestRail to review web-based projects from the back end to the front end. Conducted client-server testing to validate data transfer between on-premises locations and their cloud-based counterparts.

- Performed testing and development using Agile methodology.
- Utilized browser developer tools and integrated TestRail with Jira for comprehensive test case management.
- Learned and applied the intricacies of client-server architecture.
- Analyzed, developed, debugged, executed, maintained, and documented test cases.

**University of Toronto, Toronto, ON**

**2019**

Full Stack Web Developer Course, SCS Coding Boot Camp

**Azad University, Central Tehran Branch, Tehran, Iran**

**2014**

Bachelor of Science, Computer Engineering

— Professional Development —

Web Design – Level 1 & 2, Iranian Academic Center for Education, Culture and Research, Tehran Branch.

Computer Graphic Software-Photoshop, Iranian Academic Center for Education, Culture and Research, Tehran Branch.
